JUSTINAS BRAZAUSKAS

Junior Full Stack Developer — Java · Spring Boot · Angular · PostgreSQL

SUMMARY

Junior full-stack developer in Birmingham, working mainly with Java, Spring Boot, Angular and PostgreSQL, with earlier MERN-stack experience. I am building Jewel Studio, a live quoting platform for independent jewellers, and designed and built it end to end: database, REST API, authentication, PDF generation, email and the Angular interface. I also work in a warehouse, so I understand how operational software gets used day to day. I am looking for my first developer role in a team that ships real software.

PROJECTS

Jewel Studio — Live SaaS quoting platform for jewellers

02/2026 – Present

jewelstudio.co.uk

- Built the full stack alone: PostgreSQL data model, Spring Boot REST API and Angular frontend
- Implemented JWT authentication with email verification and password reset
- Generated two PDFs per quote on the backend: client and internal. Cost and margin data is excluded from the client file, not just hidden
- Sent quotes by email with PDF attachments via SMTP; built a server-side 14-day trial and central HTTP error handling in an Angular interceptor
- Wrote 100+ automated tests; deployed and maintained the application on Render

Coffee House — MERN e-commerce (personal project)

Based on the Traversy Media course template

- Found and fixed security issues in the template: unhashed passwords exposed to admin, order IDOR, unprotected admin routes and open file upload
- Deployed to Render with MongoDB Atlas; React, Redux Toolkit, Node.js, Express

EXPERIENCE

Warehouse Operative

11/2025 – Present

Upergy Ltd — Birmingham, UK

- Picking, packing and despatch, including Parcel Force; put-away and stock takes
- Daily work with handheld scanners and stock records

EDUCATION

Full-Stack Developer Certificate (Java / Spring / Angular)

05/2026

Kodo Kelias — Vilnius, Lithuania (Remote)

- ~450-hour programme: Java, Spring, Hibernate, SQL, Angular, REST APIs, Docker, Git, Agile/Scrum
- Progressive projects up to a full-stack Angular + Spring app with authentication and CRUD; deployed capstone and mock technical interviews

Full Stack Developer Programme

03/2023

Code Your Future — Birmingham, UK

Web applications with JavaScript, React, Node.js and MongoDB; HTML5 and CSS3 fundamentals.

MERN Stack From Scratch (Traversy Media)

01/2024

Online course — e-commerce platform

Master's Degree, Philosophy

09/2002 – 06/2008

Lithuanian University of Educational Sciences — Vilnius, Lithuania
